LinkdIn Profile

Third Year Student with good understanding of cross-platform Application Development,Software Development, Data Structures and Algorithms and ability to perform well in team, Passionate about coding and enjoys learning new technologies.

TECHNICAL SKILLS

Programming Languages	C , C ++ , ASP.NET , VB.NET , HTML ,
Tools	Visual Studio, Git, Eclipse,
Frameworks/SDK	CSS
Other	Data Structures and Algorithms, SQL , MongoDB
Operating Systems	Linux , Windows , Unix
Databases	MySQL, My Sql Server

PROJECTS

[1]. C Programming Library
• We have created the collection of many C programs . Library is user friendly due to we have used GLADE for easy development of user interface for the GTK toolkit and GNOME desktop environment.
• GLADE are saved as XML and by using GtkBuilder GTK object these can be loaded by applications dynamically as needed .

[2]. Company Management System
• This is company management system implemented in for managing data of employees , sales and various department .
• Its Is implemented in Mysql and in backend there is an Mysql server .

[3]. College Admission System
• In this the college admission system I have use HTML, CSS and Javascript in the frontend for accept the input from the user and this is user interface .
• For the backend I have use the NoSql (MongoDB) and Node.js for maintain the data and fetch data when requested and also save the login information so it is use for authentication .
